

# GHS Pictogram Training Guide

GHS-compliant labels contain one or more standardised pictograms, which communicate important information about chemical hazards in your workplace.

Print this free training guide and post it around your facility to increase safety and remind employees about the nine GHS pictograms and their meanings

Chemical / Physical Risk	Health Risk	Health Risk	
<p><b>Explosive</b></p> <p>Explosives, self-reactives, organic peroxides</p> 	<p><b>Corrosive</b></p> <p>Skin corrosion, serious eye damage</p> 	<p><b>Environmental</b></p> <p>Aquatic toxicity</p> 	
<p><b>Flammable</b></p> <p>Flammable gases, liquids, and solids, self-reactives, pyrophorics, self-heating</p> 	<p><b>Severe Toxic</b></p> <p>Acute toxicity (severe)</p> 		
<p><b>Oxidising</b></p> <p>Oxidisers gases, liquids and solids</p> 	<p><b>Acute Toxic</b></p> <p>Irritant, dermal sensitiser, acute toxicity (harmful)</p> 		
<p><b>Gas Pressure</b></p> <p>Compressed gases, liquefied gases, dissolved gases</p> 	<p><b>Health Danger</b></p> <p>Carcinogens, respiratory sensitisers, reproductive toxicity, target organ toxicity, germ cell mutagens</p> 		
<p><b>Corrosive</b></p> <p>Corrosives to metals</p> 	<p><b>To learn more about GHS labelling and compliance, visit <a href="http://bradyid.com.au/ghs">bradyid.com.au/ghs</a></b></p>
